COURSE SYLLABUS

1. Information about the program

1.1 Higher Education Institution	Babeş-Bolyai University
1.2 Faculty	European Studies Faculty
1.3 Department	International Relations and German Studies
1.4 Field of study	Political Studies
1.5 Study level	MA
1.6 Programme of study/ Qualification	Transatlantic Studies

2. Information about the discipline

2.1 Module	**Societal and Environmental Security in the Euro-Atlantic World**						
2.2 Course holder			Şerban Văetişi, Lecturer				
2.3 Seminar holder			Şerban Văetişi, Lecturer				
2.4 Year of study	2	2.5 Semester	1	2.6. Type of assessment[1]	E	2.7 Type of module[2]	OB

3. Total estimated time (teaching hours per semester)

3.1 No. of hours per week	3	3.1 of which for course	2	3.3 of which for seminar	1
3.4 Total no. of hours in the curriculum	42	3.5 of which for course	28	3.6 of which for seminar	14
Time distribution: 14 weeks					150
Study by using handbook, reader, bibliography and course notes					15
Additional library/specialised online research, field research					10
Preparation of seminars/laboratories, homework, projects, portfolios and essays					15
Tutoring					8
Examinations					8
Other activities:					15

3.7 Total no. of hours for individual study	25
3.8 Total no. of hours per semester	56
3.9 No. of ETCS credit points	6

4. Prerequisites (where applicable)

4.1 of curriculum	● --
4.2 of competencies	● --

---

[1] E - exam, ME - multi-term examinations, C - collocutional examination/assessmenț test
[2] OB - core module, OP - elective module, F - extracurricular module

5. Conditions (where applicable)

5.1 For the development of the course	● --
5.2 For the development of the seminar/laboratory	● --

6. Specific skills acquired

<table>
<tr>
<td rowspan="1">Professional skills</td>
<td>
Students following this course are expected to be able to:

use key notions of security studies in interpreting social and environmental phenomena and issues, as well as the major ideas of the interdisciplinary characteristics of these type of studies (international relations, globalization studies, development studies, social studies, environmental studies)
properly understand and use notions describing the theoretical foundations of societal security and environmental security, as specific sectors defined by the Copenhagen School of security studies, and in a broader sense (different security problems, largely generated by social and environmental issues)
identify, exemplify, describe and interpret, as case studies, various contexts of social and environmental security: national, regional, transatlantic; the contexts of globalization and development etc.
properly involve the theory of securitization in analyzing society and environment aspects, particularly in the Euro-American world
describe and use specific concepts, theories, models and data, appropriate for the fields of social and environmental studies (such as the notions of immigration, ethnic violence, societal identity, risk society, human security, sustainable development, poverty and vulnerability, risk management, environmental degradation, natural hazards etc.) used in analyzing various security problems
analyze frameworks and regulations of societal and enviromental security; discuss policies and solutions for societal and enviromental security

</td>
</tr>
<tr>
<td>Interdisciplinary skills</td>
<td>
Students following this course are expected to be able:

to learn from a specific disciplinary approach
to identify and discuss issues in their proper political-cultural and theoretical-ideological contexts
to identify and analyse specific problems of international concern and agenda
to debate issues regarding critical or controversial aspects of contemporary society
to communicate and correlate information and knowledge from different domains and fields of research/interest

</td>
</tr>
</table>

7. Course objectives (based on list of acquired skills)

7.1 General objective	This course aims at **introducing**, **analyzing** and **debating** the topics of **societal** and **environmental security** in the Euro-American world, from theoretical and contemporary perspectives.
	Students following this course should be able to **present** the nature and challenges of societal and environmental issues, in their major aspects, and to **understand** and **discuss** some of their theoretical and political implications
7.2 Specific objectives	The course will introduce in their *theoretical-political* contexts: (1) *concepts* and *theories* related to the subjects of societal and environmental security (2) *some characteristics* and *issues* of society and environment, in Transatlantic/global, and security studies perspectives (3) *expressions* and *problematizations* of social and environmental issues, as security concerns

8. Contents

8.1 Lecture	**Teaching methods**	**Observations**
1. **Societal and Environmental Security.** Introducing Topics and Syllabus	Comprehensive lectures, PowerPoint presentations	Materials used in the educational process:
2. **Social Characteristics and Issues** of the Euro-American World		
3. **Environmental Characteristics and Issues** of the Euro-American World		
4. **Security Concerns Today.** Introducing Security Studies from societal and environmental perspectives	Illustrations, contextualization, debates, specific analyses, critical thinking, reviews	Computer, Projector, PowerPoint presentation (slides), visual illustrations (pictures, maps, charts, videos), handouts of bibliography excerpts.
5. **Paradigms of Societal and Environmental Security.** Principles of The Copenhagen School of security.		
6. **Criticism and Alternatives to** the Copenhagen School of Security. Broader and critical understandings of societal and environmental security		
7. Contexts (1): **Globalization, the Euro-American World and Social Issues**	Short video screenings and discussions	
8. Contexts (2): **Globalization, the Euro-American World and Environmental Issues**		
9. Case study (1) **Immigration and Social Identity**		
10. Case study (2) **Development and Environment**		
11. Case study (3) **Risk Society and Human Security**		
12. Case study (4) **Socio-Environmental Degradation and Urban Security**		
13. Conclusive Class: **Social and Environmental Security Problems in the Euro-American World.** Old and New Security Studies		
14. **Course review.** Preparing exam.

9. The correspondence between the content of the course and the expectations of the academic community, professional associations and representative employers in the field:

After completing this course, students will have a **good knowledge** of societal and environmental security as *specific sectors* defined by the Copenhagen School of security, as well as of *various security concerns and problems*, generated by social and environmental issues, in the Euro-American and global contexts.

They will **demonstrate awareness** and **comprehension** for the *social-environmental characteristics* and *issues*, as well as for the *critical approaches on some prominent theoretical and political perspectives* on societal and environemntal security.

These will **help** them in **understanding** and **responding** to the processes occuring at the *intersection of security, society and environment*, in a world increasingly dominated by *socio-political-economic* and *ecological crises*, and *new, non-traditional security threats* and *risks*.

10. Assessment

Type of activity	10.1 Assessment criteria	10.2 Assessment methods	10.3 Percentage of the final grade
10.4 Lecture	(1) using specific informations, notions and analyses introduced and utilized throughout the course	- testing the knowledge taught/acquired - assessing the capacity to use information, interpret, and analyse - assessing the comprehension and understanding of specific aspects	70%
10.5 Seminar	(2) assessing the capacity to summarize relevant information make article/project presentations, participate in seminar discussions and debates	- joining the seminar discussions, presenting seminar projects, responding questions, suggesting creative/critical ideas	30%

10.6 Minimum standard of performance

The capacity to properly describe the nature and the challenges of societal and environmental security, as specific security theories.

The capacity to properly refer to some key terms, analyses or examples discussed throughout the course, as a broad approach on social and environmental issues with impacts on regional, national, and international security, in Euro-American and global contexts.
