## DEMETRA

Development of a Methodological Training for Company Instructors Providing Work-Based Trainings in the Plastics and Related Industrial Sectors

Project N°: 2017-01-HU01-KA202-035951

### Key words:

Dissemination of the Intellectual Outputs & Trainings & Multiplier events

### OUR PARTNERS:

### Demanding times, due to #COVID:

During the last months, we fulfilled our goal to finalize the DEMETRA project, according to the highest standards. As all regions of the EU, we confronted ourselves with new challenges related organizing multiplier events and disseminate the printed materials to our network.

But we learned to cooperate better and be more reflexive within the consortium and with our external partner institutions.

### Activities:

6<sup>th</sup> meeting: organized in Solymár, in January, 2020.

During the last meeting, the partnership discussed their achievements, experiences and thoughts of the past 2,5 years. Our objectives were:

- The finalization of project
- The analysis of IOs, feedbacks
- Preparation or feedback from multiplier events
- Evaluation of project
- How to ensure exploitation and sustainability
- To sum up the achievements of IO3 and IO4. The outcomes had been tested by mentors and students with great success. In addition, our printed materials in national languages had been published in national languages.

## Multiplier events:

The multiplier events had been implemented based on a carefully assembled agenda, and were documented accordingly. Due to #COVID, the organization of the events required more security measures, but the overall results were very satisfactory.
