### 9. The correspondence between the content of the course and the expectations of the academic community, professional associations and representative employers in the field

- Students will simultaneously develop knowledge and skills in matters of European Projects and Project Cycle Management, so as to become familiar with projects in such areas as administration, entrepreneurship, regional development, agriculture and rural development, research and innovation, education and consultancy. The abilities fostered correspond to the requirements of the labour market in the broader area of management, all the more so because the need to write and implement projects in keeping with an appropriate source of funding is a constant in the students' field of activity.
