

Material Planner with Spanish

Date: 23-Feb-2022

Location: Cluj-Napoca, CJ, Romania

Company: Alstom

Req ID:262681

We create smart innovations to meet the mobility challenges of today and tomorrow. We design and manufacture a complete range of transportation systems, from high-speed trains to electric buses and driverless trains, as well as infrastructure, signalling and digital mobility solutions. Joining us means joining a truly global community of more than **70000** people dedicated to solving real-world mobility challenges and achieving international projects with sustainable local impact.

We are currently looking for new enthusiastic colleagues to join our Supply Chain team based in Cluj-Napoca.

As **Material Planner with Spanish** you will act as a **Champion of Planning** & shape the future of green mobility with us!

Estamos buscando personas entusiastas para unirse a nuestro equipo de Supply Chain en Cluj-Napoca. Como **Material Planner con Español** actuarás como **Champion of Planning** y tendrás una gran oportunidad de cambiar el futuro de la movilidad ecológica junto con nosotros.

Your mission?

You will manage the Alstom's portfolio of suppliers (internal and/or external) for ensuring goods delivery at right time and place based on Alstom needs.

More specifically you will be responsible to:

- Express delivery needs to suppliers
- Follow up deliveries and ensure the availability of goods for Alstom projects
- Monitor Supplier's performances KPI's
- Participate/lead to Supplier's performances improvement (animation)
- Contribute with SC inputs for supplier selection
- Ensure and update the accuracy of material planning master data (in compliance with stock and logistic constraints)
- Create the Material Planning documents (Call-off, Schedule Agreement) & respective Source List
- Identify priorities associated with risk/impact anticipation and set up recovery actions
- Maintain a routine with Suppliers in order to check the status of deliveries

- Analyse and manage MRP exception messages and anticipate supply problems (backlogs, shortages, no demand)
- Maintain delivery dates in ERP
- Track missing parts until stock availability
- Ensure non-conformities replacement
- Resolve Receiving issues (overstock, shortage, damage, documentation, etc.)

Your profile?

- Degree level qualification
- Good knowledge of procurement and supply chain
- 1-3 years' experience in a relevant position
- Experience with ERP systems, preferably SAP
- Fluency in English and Spanish
- Good communication and collaboration skills, initiative and autonomy
